Uniform Residential Appraisal Report

99East Sister Rock
File # MERC-39018964

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.
3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

OTHER DATA ABOUT SUBJECT ISLAND AVAILABLE AT EAST SISTER ROCK ISLAND WEBSITE :floridaisland.com.

Typically rented by week, or daily, not monthly,as demand is more for weekly rentals, however monthly rental estimate is also given here as some clients (but only a few would rent monthly). From above rentals comparison the monthly rental value indication was \$12,750 to \$14,250 whith AN AVERAGE RENTAL VALUE OF \$13,255 WITH appraiser's estimate at \$13,000 per month,which was also estimated by owner and commented to appraiser.

CLARIFICATION: MONTHLY RENTAL IS \$13,000.00 PER MONTH

Final Reconciliation of Market Rent: ABOVE HOME RENTALS MOST SIMILAR ,BEST AVAILABLE AND PROVIDE A RANGE OF RENTAL VALUE FOR SUBJECT AND APPEARS A GOOD SUPPORT FOR RENTAL VALUE FOR SUBECT WHICH IS TYPICALLY LEASED BY WEEK AND WAS OCCUPIED BY RENTERS AT INSPECTION TIME ,AND IS RENTED ON A WEEKLY BASIS.

I (WE) ESTIMATE THE MONTHLY MARKET RENT OF THE SUBJECT AS OF 05/28/2021 TO BE \$ 13,000

There is little demand for monthly rentals and therefor subject is mostly rented on a weekly basis. According to owner subject is rentable for \$13,000 per month, and a comparable rent schedule was included for a monthly rental estimate; A rental monthly amount was estimated at \$13,000 and some owners prefer to rent on a monthly because there is less hassle than renting weekly basis ,although montly renters are much harder to find.

Monthly rent from Owners opinion/experience as verbally given to appraiser **and from rental adjustment chart results, was well supported; however no GRM was obtainable from the market for a value indication ,so principal weight given to marke value from marke comparisons method.**

There was no GRM for subject area obtainable from market by appraiser,so best value indication was from maket comparison approach as homes are purchased for owner's use purpose but when not in use by owner the property can be rented on weekly basis as vacation rental,and used by owner when not rented which is under owner's control to rent or use, subject's income can be used in the island property for maintenance, taxes and reserves for larger repairs such as roof etc.which is very costly in an island where is difficult to obtain repairs persons etc,to come and transporting the goods for repairs /replacement is difficult and expensive.

Because there is much less demand for monthly rentals , a GRM is hard to obtain, so appraiser says that this GRM value indication lacks real good support and the market approch has been given principal weight and is well supported,so that the value estimate was **\$11,000,000.00 ELEVEN MILLIONDOLLARS**

According to owner subject weekly rentals are from \$9,950 to \$11,020 per week from Jan 3 to June 12 of this year as per weekly rentals given by owners and for the rest of the year according to owner's rental increase up to \$14,500 per week for the high season. however weekly rentals for only 6 months or a year may not be used for a value calculation as the owner lacks a 1 or 2 years history on this basis and comparable of properties on a weekly basis are hard to find speciaally for longer than a few months,so market comparison method continues as best manner to estimate value estimate.

The applicant should complete all of the income and expense projections and for existing properties provide actual year-end operating statements for the past two years (for new properties the applicant's projected income and expenses must be provided). This Operating Income Statement and any previous operating statements the applicant provides must then be sent to the appraiser for review, comment, and/or adjustments next to the applicant's figures (e.g. Applicant/Appraiser 288/300). If the appraiser is retained to complete the form instead of the applicant, the lender must provide to the appraiser the aforementioned operating statements, mortgage insurance premium, HOA dues, leasehold payments, subordinate financing, and/or any other relevant information as to the income and expenses of the subject property received from the applicant to substantiate the projections. The underwriter should carefully review the applicant's/appraiser's projections and the appraiser's comments concerning those projections. The underwriter should make any final adjustments that are necessary to more accurately reflect any income or expense items that appear unreasonable for the market. (Real estate taxes and insurance on these types of properties are included in PITI and not calculated as an annual expense item) Income should be based on the current rents, but should not exceed market rents. When there are no current rents because the property is proposed, new, or currently vacant, market rents should be used.

Replacement Reserve Schedule

Adequate replacement reserves must be calculated regardless of whether actual reserves are provided for on the owner's operating statements or are customary in the local market. This represents the total average yearly reserves. Generally, all equipment and components that have a remaining life of more than one year - such as refrigerators, stoves, clothes washers/dryers, trash compactors, furnaces, roofs, and carpeting, etc. - should be expensed on a replacement cost basis.
